

## CTX-121 Calcium Hypochlorite 20g

### DESCRIPTION:

Slow-dissolving tablets for the disinfection and maintenance of crystalline and hygienically pure water.

### PROPERTIES:

Appearance .....	Solid tablets
Colour .....	White
Available chlorine .....	65%
pH (100 ppm of available chlorine).....	9,7

### CHARACTERISTICS:

Not applicable.

### DOSAGE and INSTRUCTIONS FOR USE:

**Initial treatment:** Add 2 tablets of product to each m<sup>3</sup> of water. After 2 hours, fix the water pH between 7,2-7,6 using pH Decrease solid (0010) or pH Increase solid (0020).

**Maintenance treatment:** Once the water pH is fixed, set on the baskets of the skimmers from 1 to 2 tablets of product to each 10 m<sup>3</sup> of water, daily.

This dose is merely meant as a guideline and may be modified according to differing characteristics of the pool or climate, etc.

It is necessary that all the water in the swimming pool flow again through the purifier equipment, daily.

The initial treatment (Superchloring) will have to be repeated whenever you notice a lack of transparency in the water.

The residual free chlorine will have to be placed between 0,5 and 2 mg/l. This value will easily be measured using an analyser chlorine and pH case. This control will have to be done twice a day minimum.

# Product Technical data sheet

## Recommendations:

Keep the passage of water completely open thought the skimmers and drains during the filtration process.

Keep the skimmers baskets clean (of leaves, paper, etc.) to ensure the tablets dissolve properly.

This product can neither be in direct contact with the swimming pools bade with liner, polyester or vinyl, nor with painted swimming pools because it may cause decolorations.
